## Moisture analyzer PCE-GMM 10

**Grain moisture meter for 15 crops / Small sample size / LCD display Automatic temperature compensation / Manual measured value correction possible**

The grain moisture meter PCE-GMM 10 is a compact moisture analyzer for up to 15 different cereals. This grain moisture meter is an important tool in mills, granaries or in processing industries of cereals and legumes. The cereal moisture meter helps to protect against storage, processing or buying and selling the bulk material before spoiling, due to high humidity.

The garden moisture meter requires only a very small sample volume to measure the moisture content. Within a short time, the grain moisture is shown on the display. The operation of the grain moisture meter is done via the 4 buttons. The test device is operated with a 9V block battery. Due to its compact dimensions, the grain moisture meter can be used very easily for whole grain.
